

## Global Supply Chain Management

The module "Global Supply Chain Management" aims to increase the students' ability in systemic, strategic coordination of the traditional business functions and the tactics across these business functions within a particular company and across businesses within the supply chain, for the purposes of improving the long-term performance of the individual companies and the supply chain as a whole. During the course students will discuss about: Logistics and the evolution of supply chain management, Integrating and optimizing supply chains, Integration of value chains and collaboration across supply chains, Sustainable logistics and supply chain systems, new supply chain designs and key Issues for Global Supply Chain and Logistics Management.
