

Introduction to Finance

Students taking this course should expect to learn the nature and workings of financial markets and their use by corporations, investors and others. They will acquire some skills in modern valuation techniques, including the pricing of fixed-income securities, equities, foreign exchange. They will learn about the principles of finance, including arbitrage and market efficiency. The module begins with a general overview and then goes into more detail on several concepts, financial instruments, and techniques used in financial decision making.
