

Microeconomics II

This course is designed to extend your knowledge of the basic microeconomic principles that will provide the foundation for your future work in economics and give you insight into how economic models can help us think about important real world phenomena. This course presents a logical and coherent framework in which to organize observed economic phenomena. Several economic “models” are developed and analyzed in order to help explain and predict a wide variety of economic (and sometimes, seemingly non-economic) phenomena. Topics include supply and demand interaction, utility maximization, profit maximization, elasticity, perfect competition, monopoly power, imperfect competition, game theory, welfare and externalities.

Module code

ECON 164

Semester

2nd Semester

Credits

3 ECTS

Language

English

Duration

35 Hours / 2 Weeks

Study Program

For BA Study Programs – Bank Management, Tourism and Hospitality Management, Management of Small and Medium Enterprises

Module Lecturers

- Jana Kubicova
- Bruno Sergi
- Agim Kukeli
- Eri Gjoka
- Llambi Prendi
